DX Test: WZON-620 Bangor, Maine has graciously agreed to perform a DX Test before they leave the air for good at the end of the year. The test will be on **Sunday, December 22**, at 1:00 a.m. Eastern (0600 UTC). Still waiting for the final determination of the duration.

Thanks to David Pete, Old Town, ME, who has arranged the test, and to Håkan Sundman, who first tipped us off that Finnish DXer Jari Luoma had received a QSL e-mail from WZON's director of engineering, Andy Soule, mentioning that they were considering a DX test request.

From the Publisher: Best wishes for the holidays and the New Year to all of our members. We'll take an extra week break this year and be back 3 weeks from now in the New Year!

From the Archives

90 Years Ago: From the December 19, 1934 issue of *DX News*: The upcoming DX test from KRE Berkeley, Calif. is offering prizes: a Conklin “Endura” pen and pencil set with a lifetime guarantee in a gift box will be the first prize. KSL Salt Lake City will be testing in January, the first in a series of tests from high-powered stations intended primarily for overseas DXers.

75 Years Ago: From the December 17, 1949 issue of *DX News*: Ernie Cooper reminded members that Christmas and New Year's mornings often see overnight broadcasts from Latin American stations normally not on the air at these times.

50 Years Ago: From the December 16, 1974 issue of *DX News*: Early radio talk host John B.

Grambling, who

began broadcasting on WOR in 1925, died at 77.

25 Years Ago: From the December 20, 1999 issue of *DX News*: The report of the eighth DXpedition at Cappahayden, Newfoundland was printed, along with an article from the UK's *MW Circle* about the history of independent radio in the UK.

10 Years Ago: From the December 29, 2014 issue of *DX News*: Dave Schmidt will be succeeding Ken Chatterton on the NRC Board of Directors.

--- NOTES FROM CANADA ---

Jon Pearkins jon@pearkins.com

Canada Post has lost more than \$3 billion since 2018 and has not moved a piece of mail since November 15th, thanks to a strike that shows no sign of ending any time soon. Do not mail anything to or from Canada until the strike ends. So . . . If you plan to send or receive mail, to or from Canada, you will want to wait. The strike has created *ripple effects*, most notably with the overloading of United Parcel Service and Purolator, who are *dumping* their partners by refusing to accept packages from third-party couriers who use them for all of their shipment routine.

50 years ago, CHFC and CFPR-860 Prince Rupert, BC were the only Western Canada CBC stations "South of 60" where the NABET union allowed its members to be announcers as well as board operators. This was also the case for stations "North of 60" in the NWT and Yukon, where NABET members could, in addition, read, but not write, newscasts.

590 CJCL ON Toronto – Noted off the air at **2355** on November 27 (**Saul Chernos**). Suspected tower work as their signal has recently been heard well in northern Ohio despite a licensed nine tower directional pattern that sends virtually all of its signal to the north.

- 880 CHED AB Edmonton – Heard in London, Ontario at 2336 on November 27 with a very poor signal under WHSQ New York NY. CHED is licensed to use 5 kW non-directional at night, if emergency maintenance requires a tower be powered off. (Paul Snider)
- 990 CBW MB Winnipeg – Was off the air beginning at 0935 each day from December 2 to 4 and back on the air at or before 1900 each day (Saul Chernos). “This is to do tower maintenance and to repair and replace damaged parts.” (CBC). However, the only time that they were reported OFF the air during the three days of planned outages was on December 2 from 1140:16 to 1235 (Steve Babcock). The on-air hosts were still expecting the transmitter to go off at 0935 on December 2nd (Shawn Axelrod).
- 990 CBDB YT Watson Lake – Their carrier is on 990.0015, making them easier to detect, even with CBW’s carrier on, as they are almost exactly on 990. CBDB’s audio faded in and out during CBW’s planned outage on December 2. (Steve Babcock). This CBC Radio One repeater of CFWH-FM Whitehorse is 400 Watts days and 165 Watts at night, non-directional. (Jon Pearkins – Edmonton, AB)
- 1610 CHHA ON Toronto – It took a month to be written, but an October DX Camp in Chile was rewarded with a nice lengthy verification letter (in Spanish, of course, since the station broadcasts in Spanish and the DXer wrote the letter in Spanish!). (Néstor Damián Fischetto)

--- UNID ---

- 1010 unID - 12/13 1703 – Someone with Christmas stunting with secular and non-secular Christmas instrumentals and vocals nonstop except for quick 1721 weather snip by man: “. . . lows, mid to upper 20s . . . 40s . . .” and back to Christmas songs, including ‘Last Christmas’ by Wham! at the bottom of the hour. Fair for a spell, with WJXL in a tight semi-null. Doubt a Christian format station, but ruled out (per streaming) are: WXKG Atlanta; WKJW Black Mountain; WHIN Gallatin (non-religious). Suspect WIOI New Boston, Ohio at 1000/22 Watts. Weather and fade match closely, but of course, no streaming available on their website. (TK-FL)

- 1320 unID - 11/30 2043 – Very Poor-to-Poor, with an “FM” jingle, tunes by the Stylistics, Beach Boys (‘California Girls’), a 50s song, ‘Knock Three Times’ by Dawn and “Greatest Hits on Your Radio” It’s NOT WDMJ, as they play no 50s. Thus, syndicated? (JJR-WI)
- 1450 unID - NO DATE 2053-2054 – Started what was a talk show. Faded out into the jumble. Electric Light Orchestra’s ‘Evil Woman’ trying to fight through the QRM. Would fade out, then come back. Any clues, please? (RA-CA)
- 1680 unID - 12/01 2125 – Poor, coming up and down with ‘Get Outta My Dreams, Get Into My Car’ – Billy Ocean, then ‘Beat It’ – Michael Jackson, then ‘Don’t You Forget About Me’ – Simple minds. Nothing between songs. Pirate? More than a half hour of music with no ID or anything else. Very strong at times. Also reported to be heard in the south Twin Cities metro. Some searching on the internet gave me some Facebook posts from the NRC group that indicate the WPRR is known for doing this kind of thing and that their web stream often doesn’t match their radio broadcast which makes checking them more difficult. I heard them the following evening doing the same. Unable to find an internet based SDR that could hear their translator to confirm. (MT-MN)

KDWB was named after KFWB Los Angeles and KEWB Oakland, all three of which switched to Top 40 as Color Radio under Chuck Blore's direction. Unreported Stations

No stations were reported to DDXD in this issue for the first time since at least Volume 67 (1999-2000). But one station on our unreported list, WPRY-1400, 980, is now permanently defunct, so there are only 160 currently licensed, full-power AM stations in the United States and Canada which have not been reported to DDXD during this time. The last full list was published in issue 91-18 in July and electronically in *DXtra News* in September.

DEC 9 0430 – Amid ‘Coahuila en La Hora Nacional’ about the Saltillo cathedral, also clips of an 1140 station, “Coahuila, somos todos.” Not parallel 1050 XEG, not parallel 6185; 1140 sounds similar but not parallel. There is no 1140 in Coahuila, rather 20, not 50 kW XEMR Monterrey NL. 0459 wrapup “Coahuila en La Hora Nacional,” so the entire program, not just a segment, and says will be back next Sunday, reference to FB. 0501 “La Poderosa, XERF, 100 mil wats, Piedras Negras, emisora IMER, la radio pública,” also for their 4 kW FM XHRF 103.9. Regarding XERF and state government programs, from Tim Hall, “Several Mexican states do indeed produce (or have produced) their own half-hour state government programs which air in place of the second half hour of the national hour in those states. Sinaloa, Chihuahua and Jalisco come to mind, and I think I’m forgetting a few others that I have heard over the years. Mexico City has also produced a similar program. I’m not sure if all of these are still in production. They seem to come and go. All of the states and Mexico City have their own state and local anthems, which can be heard on quite a few stations, aiding with identification.” [Hauser-OK]

Transatlantic carrier search: DEC 9 0421 – No Benin 1476; but 621, 711, 1044; and stronger 1053 per mwlist, 400 kW *SRR R.Iashi*, Romania, starts at 0355; other high power is *TalkSport* UK, Droitwich, 150 kW; Spain *COPE* 20 + 5 kW; further Ethiopia 50 kW, Iran 25. 1053 still in at 0504, lessening likelihood of eastward source. DEC 15 0405 – 657, 675, 819, 855, 1044, 1053, 1089, 1305 kHz. Mainly Spain, UK; 675 major signal is 600 kW from Qatar. 819 major signal is 300 kW from Egypt; this was stronger than 855 Spain. The E/W Flag started to malfunction recently and on close inspection it had an open on the west side feed line. After some troubleshooting, it was in the balun box. The balun had busted loose from the hot melt glue mount in the box and broke wire off the secondary to the BNC connector. Some soldering and hot melt glue and added TLC to the connections on both balun boxes and all is right with the world. Finished going through my overnight tapes through 11/15 and a few highlights are new ones KYFR-920 with KPOF-910 IBOC off for a change, KTTU-950 blasting through local KKSE and KCID-1490 full data SS ID as “Sal y Luz Radio Católica” with thanks to NRC’er Mauricio Molano with help on that tape. Needed call changes KWPN-640, KZDG-1550 and CHED 880. Up to 385 logged so far this season. Til next time 73

Sad to see the CBW-990 Winnipeg MB three days of transmitter maintenance turn into an hour or so, from the reports I have seen. But I also know that broadcast engineers are like data center technicians: schedule the worst case scenario Planned Outage and the best possible outcome is not to need it at all.

Even though I never caught any of the outage(s), I did learn a bit more about daytime DX conditions and heard a new station on what had been a “One Station Frequency.” On day power, KSOO-1000 Sioux Falls SD was in strong in the late afternoon with no sign of KNWN Seattle WA. KNWN is not just unnullable here at night but often causes significant interference on 990 and 1010 even on my most selective radios.

As for CBW, it was interesting to see how many hours after Winnipeg sunrise that they were still listenable here in Edmonton. And how they would fade completely out for quite a while, only to reappear later. As someone recently corrected me on Facebook, there can be skip at High Noon. To put it in his words, “You sure weren’t getting groundwave from KSL-1160 Salt Lake City UT into Vancouver at Noon in the Winter,” referring to my mention of Salt Lake City being my most distant reception into Vancouver in the Winter in my Daytime DX Log.

For a few years in the late 1960s, a few of us in the Pacific Northwest kept a separate DX log, just for reception of stations from 11:00 AM to 1:00 PM PST. We generally only kept an eye out for new stations during the shortest days of the year, from November to February. What surprised me most was how there might be a unique opening to a specific area, even a single city, on just one day. Reception could be solid or fluttery.

One example sticks in my mind as one daytime DX recording has survived the years, of hearing the two stations in Nampa ID. The most memorable moment was an ad for a one hit wonder, The Strawberry Alarm Clock, coming to Nampa long after their one hit when few people even remembered their name.

Admittedly, DX in the hours before sunset is a different matter. My KSOO reception this past week reminds me of WHO and WCCO coming into Vancouver in the Winter long before sunset. But it also reminds me of the, surprising to me, answer that I got from Edmonton DXers back then when I asked them about Trans-Atlantic DX. They would hear it on Winter afternoons even before Eastern U.S. clear channel stations started coming in.

Veries: 690 WQNO, 920 KARN, 1000 WYBT, 670 WSCR. WSCR was Chicago station number 5 heard and verified. I'm up to reception reports to over 40% of domestic stations heard. Goal is 50% and I think I can reach it. 12/14 heard KRVN in Nebraska for a new state heard. Up to 30 now. Looking forward to trying for the WZON DX Test. Pretty slim chance with a local on 620 but I'll do my best. Merry Christmas and Happy New Year to all. Martin

Jim Kauer, 37 Kendall Drive, Kennett Square PA 19348 (sent to HQ with DXN renewal)

I still enjoy reading *DX News* after all these years. I joined when I was sixteen years old, dropped out for a while after my Navy years (the NRC sent me *DX News* during these years for free, thanks to Ray Edge). Then, I rejoined later after college, and labatory work for DuPont. I got my ham radio license and operated as W8DFD, W9MWC, and now W3FFU.

I am still on the air in a retirement home at age 97 with a very poor antenna draped in several bushes! Broadcast band reception is not too good, but the higher ham bands (40 to 10 meters) are often tolerable. So it goes!

Merry Christmas and good DX to all.

Linda Brodsky, Malverne NY

I spent a little time with the new RSPDx R2 but conditions have been so noisy here it's hard to make a fair assessment. I downloaded the latest stable version of SDR Connect and see that I have a lot to learn if I'm going to get the most out of it. I'm sure there'll be a few refinements as more people have experience with the program. I'm more comfortable with SDRConsole and like the ability to use it with all my SDRs (Airspy, SDRPlay and RTL-SDR) but I'm determined to learn SDRConnect to see if it has some features specific to the RSPDx R2 that Console doesn't have. Wishing everyone a wonderful holiday season.
